Smell	Product specific
Density	1,30 ± 0,05 kg/litre
Flash point	> 100°C
Foaming	low
Soluble in	water
Solubility	incomplete
Normal concentration	pure
Normal temperature	room temperature
pH undiluted	14

SPECIAL QUALITIES:

*Because of its jelly form **BioClean Monster** is very easy to apply and a longer contact time is possible.

***BioClean Monster** is specially developed to remove inks and varnishes which can't be removed with normal cleaners..

***BioClean Monster** can be used as a spot cleaner for anilox rolls.

HARMLESS TO:

Stainless steel and ceramics. Not suitable for aluminum and zinc! Be careful with the rubber roller! Always check on a small spot if the **BioClean Monster** isn't harmful for the surface!

APPLICATION AND DOSAGE:

BioClean Monster is used for on-press and off-press cleaning of anilox rolls. Apply **BioClean Monster** pure on the surface. Rub thoroughly with a suitable Sponge/brush. Wait about 5 minutes. Be sure that the **BioClean Monster** not dried on the surface. Rub again with the Sponge/brush. Wait another 5 minutes. After the 5 minutes rinse with water while rubbing with the Sponge/brush.

SAFETY:

When using **BioClean Monster** wear suitable personal protective equipment. For more information see the Safety Data Sheet which is available on demand.
